Notes:

1. Platforms that have a software load with CMF Block before 2.0 are not PM-CPDLC (ATN-B1) capable and do not comply the EC 29/2009 Mandate. This would apply to the Cessna Sovereign and the Hawker 4000.

2. Platforms with the software loads shown above meet the EC 29/2009 Mandate but are Not eligible for the White List unless otherwise noted (See Note 3).

3. Platforms with a (*) are currently eligible for the White List because they have a CMF block version 3.1 or greater.

4. Platforms loads are shown to have either an ATC Block or NG FMS.

5. Platforms not fitted with mod D or greater for the VDR element (or mod S or later for EASy III avionics) are also Not eligible for the White List. Most EPIC platforms have VDR MOD S.

6. The Pilatus Platforms are APEX (Not EPIC Platform) but is shown for completeness. Non EPIC Radio is used.
